

Hypochondriacs Unite!

...

Get reliable information about a random health
condition you Google Search

What do you do when WebMD
MayoClinic, and Wikipedia
diagnose you with different
diseases after you search your
symptoms?

Panic?

Don't Fear!

The Magic URL is here!

<http://127.0.0.1:5000/>

Now you know what a heart attack is.

Do you think you had one?

That confirmed heart attack definition provided by:

Jaccard Similarity

- The 3 definitions for a “heart attack” were 55.3% similar

Cosine Similarity

- Yea, not working yet

Hypochondriacs Unite!

Another Day!

Come back when the magic URL can:

- Be trained on more websites
- Search for more problems than Heart Attacks
- Use more similarity metrics and compare them
- Create a database listing websites conflicting with training set
- Compare symptoms, treatments, risk factors, and more
